

FITCH AFFIRMS TOLEDO CITY SCHOOLS (OH)'S IDR AND ULTGO BONDS AT 'A-'; OUTLOOK STABLE

Fitch Ratings-New York-03 August 2016: Fitch Ratings Affirms the following Toledo City Schools, Ohio ratings at 'A-':

--\$2.3 million (excluding refunded maturities) unlimited tax general obligation (ULTGO) bonds, series 2009;

--Issuer Default Rating (IDR).

The Rating Outlook is Stable.

SECURITY

The bonds are a general obligation of the district, payable from an ad valorem tax on all taxable property within the district, unlimited as to rate or amount.

The bonds qualify for the Ohio School District Credit Enhancement Program, which is rated 'AA' by Fitch.

KEY RATING DRIVERS

The 'A-' rating reflects the district's limited revenue raising flexibility, adequate ability to cut expenditures, moderate long-term liability burden and limited gap-closing ability during times of economic recovery.

Economic Resource Base

The district covers 72 square miles in Lucas County in northwestern Ohio, approximately 75 miles east of the Indiana border and within five miles of the Michigan border. The district's population decreased approximately 10% since 2005 to 281,031 in 2015, affected by the decline of a large manufacturing presence. School district enrollment is down approximately 12% since 2010 but saw a modest increase of 2% in 2015 from the prior year. Fitch expects enrollment to continue to see modest positive gains in the near term due to new pre-school programs.

Revenue Framework: 'bbb' factor assessment

Revenue growth is expected to remain stagnant. Changes to the state aid formula, along with some gains in enrollment may drive modest future revenue gains. The district's independent ability to raise revenues is restricted by state legal parameters.

Expenditure Framework: 'a' factor assessment

Flexibility of main expenditure items is adequate and may result in manageable cuts to core services during an economic downturn. Fitch believes the natural pace of spending growth is above expected revenue growth.

Long-Term Liability Burden: 'aa' factor assessment

The combined liability burden of overall debt and unfunded pension liabilities is moderate in relation to the district's resource base.

Operating Performance: 'bbb' factor assessment

Fitch believes the district has limited gap-closing ability. Voter support for new and renewal levies has been inconsistent, which could result in stressed operations in an economic downturn as it has in the past.

RATING SENSITIVITIES

ENROLLMENT CHANGES: Enrollment declines and increases in charter school competition may decrease state aid available for district operations and negatively pressure the rating.

VOTER SUPPORT: Continued voter support for new and renewal levies is key to financial stability. Changes in patterns of voter support could shift the rating.

CREDIT PROFILE

The district's territory adjoins Lake Erie and encompasses approximately 70% of the city of Toledo, 66% of Spencer Township, 8% of Harding Township and less than 1% of the Village of Ottawa Hills. The local economy is driven mostly by manufacturing with a concentration in the automotive industry complemented by the healthcare and university sectors. The city of Toledo reported unemployment of 5.1% in May 2016, which is down slightly from 5.6% the prior year, but remains higher than both the state and the nation. Income levels are below average both on a median household and per capita basis and 2014 poverty rates were nearly double those of the state.

Taxable assessed value (TAV) appears to have stabilized after a sharp, cumulative 32% decline since the 2007 peak. The 2015 triennial adjustment resulted in a modest 0.55% decrease in values. For 2016, the County Auditor's office anticipates that residential property values will remain level, which Fitch believes is achievable. Leading taxpayers are diverse and include a casino, several utilities and large real estate holdings.

Revenue Framework

Ohio school districts operate within a restrictive revenue environment. Revenue growth prospects are slow and the legal ability to raise revenues is limited. State aid, comprises 70% of general fund revenues. Outside mills, levied on a fixed rate and fixed dollar basis, account for 24% of general fund revenues.

The district expects state aid to increase approximately 6% in 2016 and conservatively estimates it to grow an additional 3% in 2017. The district is competing with both charter schools and other districts (through open enrollment) for per-pupil funding. Nevertheless, enrollment modestly increased last year due to headstart programs that transition children into the elementary public school system without the option to transfer to charters. The program will add another 340 students, or 1.5% of total enrollment, to the public school system. Management expects the attraction and retention of students, along with funding adjustments made to special education and career technology programs to positively impact state-aid revenue growth. Nevertheless, Fitch assumes that revenues will modestly increase below the level of inflation.

Management expects ad-valorem tax revenues to remain flat, which Fitch believes is reasonable, given AV trends and the limited ability for the property tax millages to capture economic growth.

Fixed rate millage can capture economic growth from new construction. However, fixed rate levies on existing property are subject to rate roll-back provisions during times of revaluation that prevent the district from receiving revenues in excess of the prior year. Fixed rate levies comprise approximately 18% of general fund revenues.

Fixed dollar levies do not capture AV growth and account for 6% of general fund revenues.

State law limits school districts' ability to raise revenues without going to voters, to fees, charges, and other locally controlled revenues. However, districts like Toledo that have a high percentage of economically disadvantaged students in attendance are prevented from raising these charges.

Income and property tax 'outside millage' levies require voter approval. The district's outside millage is comprised of both a continuing and renewal levies. Renewal levies are exposed to voter-renewal risk every five to 10 years. Outside mill renewal risk accounts for 8.6% of general fund revenues.

Expenditure Framework

Staff salaries are the largest expenditure item, comprising approximately 68% of general fund spending.

The district is at risk for the pace of spending growth to exceed the expected pace of revenue growth without active control of expenditures.

However, expenditure flexibility is adequate. Fiscal 2015 carrying costs for debt and pension, and other-post employment benefits (OPEB) are low at 7.9%. Carrying costs modestly declined from prior years, due to reductions in OPEB actuarially required contributions and increased governmental expenditures.

Charter school spending currently comprises a high 28% of general fund expenditures. The district may be able to limit the impact of charter school spending on its budget if it is able to attract new students. Discretionary spending was reduced by 25% for the district's 2016 cash budget, which limits future opportunities for cost savings.

Current labor contracts are in place for a one-year term. After expiration, the district and unions will participate in an interest-based bargaining process requiring all parties to jointly agree on bargaining topics. The district anticipates that the process will provide for fiscally manageable negotiation terms.

Long-Term Liability Burden

The district has a moderate long-term liability burden, with overall debt and unfunded pensions at 11% of personal income. Direct debt levels (17% of total long-term liabilities) are expected to decline as the district does not plan to issue new debt in the near term and 50% of debt is scheduled to be retired within the next 10 years. Unfunded pension burden comprises approximately 63% long-term liabilities. The plan's weak actuarial funding levels may cause the district's unfunded pension liability to increase.

Pension and OPEB are provided through two state sponsored defined benefit pension plans, the Ohio School Employees Retirement System (OSERS) and the Ohio State Teachers Retirement System (OSTRS). When combined, the plans reported assets to liabilities ratio is 74.2% assuming a 7.75% rate of return, as of Dec. 31, 2014. Using Fitch's more conservative 7% rate of return the estimated assets to liabilities ratio is 68.5%.

Operating Performance

Financial resilience is adequate. Fitch assesses the district's inherent budget flexibility at 'midrange' due to the limited legal ability to raise revenues accompanied by solid expenditure flexibility. Financial resilience through economic downturns has been pressured by poor support for new voter-approved levies. For example, the district passed new operating levies in 2014 which were the first new levies to receive voter-approval since 2008, with three failed attempts in between. During this same period fund balances fell to a deficit position and did not regain positive balances until the passage of the 2014 levy. Operations could experience additional stress if future levies do

not receive voter approval, causing a delay in gap-closing measures and further reduction of fund balance. Current unrestricted general fund reserves total 12.3% of spending.

Management adheres to the common Ohio school district budgeting practice of exhausting reserves before a new tax levy is submitted for voter approval or other policy action is taken to replenish fund balances. While the district follows this budgeting cycle, management has proactively built in some additional cushion in preparation for times of economic distress. This includes restricting \$6.6 million of 2015 operating surplus to a general fund reserve account (approximately 2% of general fund expenditures) and the option to use budgeted pay-go capital expenditures for general fund operations.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
